MARRIAGES.

On the 7th April, at St. John's Church, Mansfield, Nottinghamshire, Rev. W. Mayes, vicar, Edward Shute, late Crown Solicitor, Hongkong, and Upper Sydenham, to Miss Emily, daughter of Thomas GODFREY, of Mansfield.

On the 3rd May, at Holy Trinity Cathedral, Shanghaik, by the Rev. G. W. Constance, C.M.S. Major-General Sir CHARLES DILKE, K.C.B., of Captain's Lodge, Ecclesall, to General Francis BURTON, Buckinghamshire, England.

DEATH.

At the General Hospital, Shanghaik, on the 3rd May, Elizab. WELLS, engineer, formerly of the Taku Tug and Lighter Co., aged 44 years.

The Daily Press.

HONG-KONG, MAY 11th, 1891.

In the course of the discussion on the paper on "Australian Defence" read by Major-General Sir J. BEVAN EDWARDS, R.E., at the Colonial Institute of the 10th March, pamphlet copy of which has just reached us, some interesting references to the coaling stations were made. Sir BEVAN EDWARDS himself naturally had little to say about them in his lecture, his only direct reference to them being as follows—

"Hongkong, Singapore, Ceylon, and Mauritius, in the large contributions they have made to defence, and the considerable annual sums applied to military purposes."

"We not only defend ourselves, but the interests of the whole nation, including

"those of Australia." Just so, and we trust the coming Commonwealth will be ready to accord as handsome a recognition of the fact as our former military head. The Crown Colonies named have hitherto received small thanks for the very substantial contributions they are compelled to make annually to Imperial and Colonial defence, and the wealthy and lightly taxed Australians are not likely, we fear, to volunteer to take up a share of the burden. Certainly, as Sir WILLIAM JEVONS remarked subsequently, they have never been asked, and possibly would be more astonished than gratified by such a request. Sir JOHN PORE HENNESSY thought the coaling stations might possibly have to be defended by troops from Australia, expressed a doubt whether the Australians would consent to send their soldiers such a distance and hasted to trot out his suggestion that the Royal Marines would be better fitted and more available for the purpose. General EDWARDS, however, disbelieved any idea of asking Australia to undertake the defence of the coaling stations.

The delivery of the English mail was begun at 10 A.M. yesterday.

The P. & O. steamer *Edwards* left Shanghai for this port noon on Saturday.

The C.P. steamer *Empress of India* left for Japan, &c., on Saturday morning.

The British cruisers *Sherman*, *Leander*, and *Mercy* left Amoy on the 8th inst. for Nagasaki.

One of the men who was injured by the blowing up of the steam launch *Macao* died at Hospital on Saturday.

The *Hu-pao* says that the tea season at Hang-chow is brief. The crop before the spring rains was sold at 620 cash per catty. The present crop is selling at 550 cash per catty.

The following telegram has been received in Singapore from Colombo in reference to Sir Frederick Waller's condition—"Sir Frederick Waller stronger and generally much better."

The Agents (Meek, Molucks & Co.) inform us that the M. & S. steamer *Stuttgart*, Captain Schackmann, carrying the German mail dated Berlin 14th April, left Singapore at 8 p.m. on the 15th April.

The King of Siam has approved the construction of a railway from Bangkok to Paknam. The length of the line is fourteen miles. It promises to be the main line in Siam, as it is to be completed by the 15th December, 1892.

The *Daily News* of the 6th inst. says—"It is stated that the tea market was opened in Bangkok by a Russian buyer, who took 100 catties at Taipa 55, or more than 10c above last year's opening rate. It is reported that the market was opened yesterday at Kluang."

The trooper *Zamor* put into Colombo on the 23rd inst., and reported that Fleet-Surgeon John Lambert had died the previous night on board of a steamer bound for the Colony.

In practice of a brief, and I hope of a great deal of service, to the defence of the army, than handing them over to the control of the navy. He said—

"Other nations expect their navy will be compelled to retire to their coaling stations, and sea-forts, while every Englishman, on the other hand, and every colonist, believes that when there is a big war, the English Navy will hold and sweep the sea, and when the English Navy is at sea, the world—certainly not the Navy—must look after the coaling stations and fortresses."

There is another argument. In all nations, except ours, the first line of defence is the army." These are good arguments for the maintenance of the existing arrangement certainly, more especially as Sir Roderick BULLER was also at the pains to assure his hearers that at no time had so good an understanding existed between the two great lines of defence, or a more earnest effort been made by them to establish a complete system for the defence of the empire. Nevertheless, though we quite concede the fact that in time of war the Navy should be free to sweep the sea and the work of defending the coaling stations be left to others, there is no particular reason why it should not be left to Her Majesty's Royal Marines. Of course this would necessitate a large increase of this force, probably by 6,000 men, but they could be raised as easily as doubts as new regiments, and the command of the garrison could be entrusted to the senior officer of marines in the absence of the Admiral. There would be little actual saving effected by the change, but it would prevent the possibility of divided or conflicting authority, as the commandant would get his instructions direct from the Admiralty.

What is, however, of more importance than the responsibility for the defence of the coaling stations is the efficiency of their armament and garrison. The prevalent opinion of those present at the Colonial Institute was, we are glad to note, that the position of security so far as the latter is concerned has not been reached. This was well posted on the subject. He said—"I fear when Mr. STANHOPE says we know exactly what garrisons are needed for our stations, we are not yet in the position of having supplied them, and I am one of those who fear that the Navy will find a most grave addition to its duties in the first days of a war—immediately before and immediately after the outbreak of war—in having to convey garrisons to coaling stations in all parts of the world. I cannot but think that we are relying too greatly in these days of sudden war—when they are practically over before they are declared—upon our power to rapidly garrison these stations after war has actually begun." Sir CHARLES DILKE, the former left to the protection of a few black troops, the latter altogether undefended. The Chairman (Lord BRASSEY) said that Mr. STANHOPE had given assurances that the armaments necessary for the stations had been provided, and that there was little left to be done in regard to guns and works. His lordship went on to remark, however—"I do not think we are likely to receive similar assurances with regard to the garrisons, and I have no hesitation in saying that the garrisons are needed for our stations, we are not yet in the position of having supplied them, and I am one of those who fear that the Navy will find a most grave addition to its duties in the first days of a war—immediately before and immediately after the outbreak of war—in having to convey garrisons to coaling stations in all parts of the world. I cannot but think that we are relying too greatly in these days of sudden war—when they are practically over before they are declared—upon our power to rapidly garrison these stations after war has actually begun." Sir CHARLES DILKE then instanced the case of Sierra Leone and Equatoria; the former left to the protection of a few black troops, the latter altogether undefended. The Chairman (Lord BRASSEY) said that Mr. STANHOPE had given assurances that the armaments necessary for the stations had been provided, and that there was little left to be done in regard to guns and works. His lordship went on to remark, however—"I do not think we are likely to receive similar assurances with regard to the garrisons, and I have no hesitation in saying that the garrisons are needed for our stations, we are not yet in the position of having supplied them, and I am one of those who fear that the Navy will find a most grave addition to its duties in the first days of a war—immediately before and immediately after the outbreak of war—in having to convey garrisons to coaling stations in all parts of the world. I cannot but think that we are relying too greatly in these days of sudden war—when they are practically over before they are declared—upon our power to rapidly garrison these stations after war has actually begun." Sir CHARLES DILKE then instanced the case of Sierra Leone and Equatoria; the former left to the protection of a few black troops, the latter altogether undefended. The Chairman (Lord BRASSEY) said that Mr. STANHOPE had given assurances that the armaments necessary for the stations had been provided, and that there was little left to be done in regard to guns and works. His lordship went on to remark, however—"I do not think we are likely to receive similar assurances with regard to the garrisons, and I have no hesitation in saying that the garrisons are needed for our stations, we are not yet in the position of having supplied them, and I am one of those who fear that the Navy will find a most grave addition to its duties in the first days of a war—immediately before and immediately after the outbreak of war—in having to convey garrisons to coaling stations in all parts of the world. The Chairman (Lord BRASSEY) said that Mr. STANHOPE had given assurances that the armaments necessary for the stations had been provided, and that there was little left to be done in regard to guns and works. His lord

to us expenditure which will make the expenses this year about the same as before, the Committee estimate that they carry with a reduction in the current expenses, carry on the Chamber of Commerce at a cost of about Rs. 150 or 160 a year. That includes the Th. 60/- per month for which we are committed, but the Income Committee might subtract a portion of these promises. The expense of printing and stationery Th. 296 may be reduced, but the other items are not much. We propose to make the Secretary's salary Th. 300/- as he will not have a staff attached to him. In the Committee's estimate that the expenditure will be about Th. 1,450, and if we have the same number of members we can make a reduction in the subscription from Th. 60 to Th. 30, or Th. 15 at the outside. The debt balance at the end of 1880 and the expense to which we are committed this year will leave us but little at the end of the year Th. 830. The Committee deem it best to propose that we ask for a call of Th. 200 from every member. That will clear off the debt balance and in the meantime we can make a reduction with economies working there will be a saving.

The CHAIRMAN then moved, Mr. MACCANNON seconded and it was agreed—that the accounts and report as presented be passed.

The CHAIRMAN said the Committee consisted of ten members, and as that number of names had been omitted, he proposed the election of those gentlemen—Messrs. Arabin, J. C. Heis, J. Graham, H. R. H. Hart, J. Macgillivray, E. A. Pinet, J. G. Purdon, C. F. Rowland, R. Simpson Shaw, C. Vincent Smith.

The motion was carried.

On the motion of the CHAIRMAN, seconded by Mr. Purdon, it was decided—that the publication of the circular be abandoned from the present date.

Mr. MACCANNON moved, Mr. C. VINCENT SMITH seconded, and it was agreed—that a call be made of Th. 20 per member to meet the balance at debit of the Chamber's account.

The following motion was terminated.

The last motion was presented to the members of the Chamber at the annual general meeting which was held at the office of the Chamber on Tuesday the 2nd April, 1881.

The Committee elected at that meeting were Messrs. J. C. Heis, D. Brand, C. Hilliard, Carl Jackson, J. H. Latora, J. Macgillivray, E. A. Pinet, J. G. Purdon, F. W. Quisenberry, and C. Vincent Smith.

M. J. O'PHERSON was elected Chairman and Mr. J. Macgillivray Vice-Chairman.

Mr. O'PHERSON and Mr. Jackson retired on their departure from Shanghai, and Mr. Lewis has withdrawn from the Chamber.

The Committee, at the instance of the Consul, voted to take steps to prevent the visitation of the British Consul to Hongkong. Councillor, the Committee invited the attention of the Hongkong Chamber of Commerce to the subject, and the Hon. Chamber of Commerce, Hongkong Chamber, a large proportion of the mercantile community and due forwarded to the proper quarter.

The Committee, at the instance of the Consul, voted to report to Mr. Kleinwein, 1st Commr. of Customs at Ningpo, on the subject of contracts between Chinese and foreign firms, and to the Consul, the Committee addressed a letter to Mr. M. A. Pinet, the Consul-General of Quinsay, begging him to use his influence with the authorities to recommend the withdrawal of the Chinese Consul.

A new set of Provincial Bills with regard to the payment of Tents Passes by H.M. Customs was submitted to the Hon. Consul, and the Consul, and the Committee of the Committee, and the correspondence is appended.

The Committee, at the instance of the Minister of Finance, Peking, to the tax upon trade caused by the presentation, whereby a large amount of capital is lost, and the Minister of Finance, Peking, replying through the State Council, said, that, for further detail, without which they could not approach the Chinese Authorities. Some difficulty has been experienced in obtaining a reply, as the Committee are not willing to furnish particular information, but sufficient has been obtained to show how important the matter is. The correspondence is appended.

The Committee had an interview with Mr. Pinet, in which he explained that he was conducting some experiments in the preparation of sugar and the preparation of the stalks after the extraction of sugar, and desires to have the system on a more extended scale in one of the largest distilleries, for which purpose he has now obtained the services of Mr. E. H. Hart, to Sir Robert Hart, whom he proposed to visit and to give support to induce the Chinese Authorities to allow him to proceed to Peking, and to give Mr. Pinet the required support and protection.

The anticipation of the Committee that the circular would be issued, and the present news, that the members have very nearly been absorbed by the increase in the cost of production. The number of Chinese workers have increased, and the present news, that the cost of production is still increasing, is most unfortunate. This loss is, as previously stated mainly due to the cost of obtaining the information.

The Committee, at the instance of the Consul, the 13th instant, sent a copy of the circular to the Hon. Consul, who, however, did not consider that the Chamber could interfere with arrangements which had been made.

The Committee, at the instance of the Consul, the 13th instant, sent a copy of the circular to the Hon. Consul, who, however, did not consider that the Chamber could interfere with arrangements which had been made.
